

Jesse (Yubo) Qin, PhD

STAFF / PRINCIPAL AI PLATFORM ENGINEER

New York, NY | jesseqin.office@gmail.com | [linkedin.com/in/jesseqin-phd](https://www.linkedin.com/in/jesseqin-phd) | jesseqin.me

PROFILE

AI platform engineer with 8+ years across enterprise AI, distributed infrastructure, data systems, and recommendation platforms. Builds the context, evaluation, governance, and reliability layers that turn models into production systems across cloud, on-premises, and high-compliance environments. Previously led a global platform serving 18M+ users at 99.99% uptime and reduced cloud spend by approximately \$500K in three months.

CORE EXPERTISE

Capabilities: AI Platform Architecture | Context Services | RAG & GraphRAG | LLM Evaluation | Governance & Access Control | Distributed Systems | Production Reliability | Observability | Cost Optimization | Technical Leadership

Technology: Python | FastAPI | SQL | Elasticsearch | REST APIs | Docker | Kubernetes Deployments | AWS & GCP | CI/CD | Grafana | PagerDuty | Databricks | PySpark

PROFESSIONAL EXPERIENCE

KAMIWAZA AI | Member of Technical Staff

2025-Present

- Build enterprise AI platform capabilities that turn distributed organizational data into governed, agent-ready context across Kubernetes, bare metal, VMware, AWS Outposts, Azure, and secure-cloud environments.
- Design context, ontology/GraphRAG, model-evaluation, and permission-aware workflow capabilities; translate enterprise constraints into reusable platform patterns for production AI systems.
- Partner across product, engineering, and customer-facing teams to improve provenance, auditability, access boundaries, reliability, validation, and adoption.

KOODALL AI | Vice President of TechOps, Founding Team

2024-2025

- Built and launched production backends for FaceAR, GenAI editing, and recommendation products using Python, FastAPI, Docker, and AWS.
- Established observability, cost tracking, security audit logging, and delivery practices that improved production readiness across multiple AI product initiatives.

GETTR USA | Director of TechOps; Senior Data Analytics Engineer; Backend Engineer

2021-2024

- Led platform engineering and technical operations for a global social platform serving 18M+ users; sustained 99.99% uptime through high-availability design, disaster recovery, monitoring, alerting, and data replication.
- Reduced AWS cloud spend by approximately \$500K within three months through workload, architecture, and service optimization while maintaining production reliability.
- Improved incident response and operational support across moderation, legal workflows, mobile releases, and trust-and-safety infrastructure through monitoring, replication, and cross-functional operating practices.
- Designed data, search, analytics, and recommendation services supporting real-time product decisions and high-volume content workflows.
- Built the platform's 0-to-1 backend foundation, Elasticsearch search capabilities, analytics pipelines, and executive dashboards for MAU, DAU, retention, and product decisions.

RUTGERS INFORMATICS DISCOVERY INSTITUTE | Graduate Assistant

2015-2021

- Developed distributed workflows for real-time analytics and national science observatories; researched intelligent data discovery, knowledge networks, caching, and workflow scheduling.
- Contributed to a Top500-ranked HPC environment through performance work across compute, storage, and network layers; published 7+ peer-reviewed papers on data-intensive and distributed computing.

LEADERSHIP & PUBLIC WORK

- Founder, Solo Unicorn (2025-Present) - Build an AI-native founder and builder community focused on practical agent workflows, product experiments, and one-person companies.
- Maintain a public portfolio of AI experiments and writing at jesseqin.me, connecting hands-on product building with enterprise AI strategy and operating practice.

EDUCATION & CREDENTIALS

NYU Stern School of Business - M.S., Business Analytics and AI, 2025

Rutgers University - Ph.D., Computer Engineering, 2021; M.S., Computer Engineering, 2016

Project Management Professional (PMP), Project Management Institute, 2023
